The decoSchwank – Comforting Heat as an Art Form

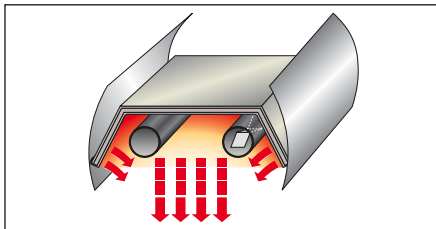

In collaboration with the world's most respected designers, Schwank engineers have set a new standard for radiant heaters: the decoSchwank.

Thanks to its advanced technology, the decoSchwank sets itself apart by providing superior performance and high energy-efficiency. It fuses durable and high quality materials with a fine design, producing a heater of outstanding elegance and functionality.

Its beautiful design and elegance makes the decoSchwank the ideal choice for buildings where style and sophistication are the watchwords such as: shopping malls, showrooms, car dealerships, foyers, galleries, sports halls, and churches as well as industrial buildings.

The decoSchwank's efficiency and even distribution is due to the unique, patented Schwank ceramic tile producing an exceptionally long, laminar and even flame.

Further important features are:

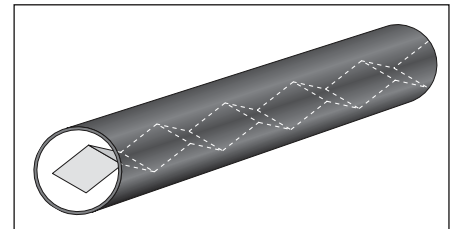

isoSchwank: Radiant Insulation

The housing insulation minimises the convective heat loss and enhances the energy efficiency.

triComfort: 2-Stage Operation

The 2-stage operation allows adapting the heat output according to the actual heat requirement. As a result, a considerable reduction of on/off cycles significantly enhances the product's durability.

turboSchwank: Turbulator

The stainless steel turbulator located in the tube optimises the heat transfer and notably increases the radiant efficiency.

The decoSchwank Benefits:

- High energy efficiency: 30%-50% energy savings compared to conventional systems
- Very short warm up time
- Possibility of partial heating or specific areas
- No dust swirls and drafts
- Quality, durable and comfortable heat

Schwank – A Strong Brand:

- Worldwide market leader
- Inventor of the infrared heater
- Over 50 years of experience and innovation
- Over 1 million heaters sold
- Made in Germany

Schwank – Reliable Service

- Professional advice
- Neutral system comparison
- Energy cost saving quotations
- Installation, commissioning and maintenance services

Type:	Input:	Length:
15 U	15 kW	4.000 mm
20 U	19 kW	7.000 mm
30 U	29 kW	7.000 mm
40 U	39 kW	10.000 mm
50 U	49 kW	13.000 mm
60 U	59 kW	14.500 mm

Technical details may vary.
